

AMENDMENTS TO THE SPECIFICATION:

Please replace the original Abstract, Page 12, with the following amended Abstract:

ABSTRACT

A memory card for integrating functions of the USB interface ~~and an adaptor for the memory card are disclosed in the invention. The memory card is to provide~~ includes a memory chip inside a main body. ~~Besides, a~~ A SD or MS control interface, a USB control interface, a controller, and a storage memory are built in the memory chip. ~~Additionally, a plurality of conductive~~ Conductive bars ~~is provided for being~~ are electrically connected to the memory chip, and ~~the conductive bars also stick out from one end of the main body. On the other hand, the~~ An adaptor for the memory card includes an insertion socket ~~to be inserted in by~~ to receive a SD memory card or a MS memory card. ~~Also, a plurality of conductive~~ Conductive pins ~~is provided~~ are positioned inside the insertion socket to be electrically connected to the memory card. ~~Finally, a~~ A USB connecting head is provided at the front end of the insertion socket and electrically connected to the conductive pins inside the insertion socket. ~~Hence, the~~ The SD memory card and the MS memory card ~~of the invention can also be inserted into the USB slot for expanding through the application scope of the two memory cards~~ through the adaptor.
